

USING THE MCR SPEAKERS

We have a new amplifier in the MCR, set up for all inputs: TV, DVD player, auxiliary jack and Bluetooth.

TV

- 1) Select input AUDIO 1, or press the TV Scene button on the amplifier.
- 2) For the NowTV box, use HDMI 1 on the TV input selection.
- 3) For input to the TV through the wall HDMI port e.g. from a laptop, use HDMI 2 on the TV input selection.
- 4) Sound will come from both TV and speakers, adjust volume as necessary.

DVD PLAYER

- 1) Select input HDMI 1 on the amplifier, or press the BR/DVD Scene button.
- 2) Select input to HDMI 3 on the TV.
- 3) Video should play on the TV with sound coming from the surround speakers only.

PROJECTOR/AUX JACK

- 1) To output video onto the projector, plug your device into the VGA cable plugged into the wall. There is a VGA to Mini-DP adapter in the cupboard below.
- 2) To output sound through the speakers, plug the 3.5mm jack into your device.
- 3) Select input AV 3 or press the AUX Scene button on the amplifier.

BLUETOOTH

- 1) Select Bluetooth or press the RADIO Scene button on the amplifier.
- 2) Hold down MEMORY on the front panel for 3 or more seconds until "Searching..." appears.
- 3) Pair with the amplifier on your device (listed as "RX-V379 Yamaha")
- 4) Playback media on device, sound now comes from speakers.
